Art Unit: 3751

1. Applicant's election with traverse of group 1, an inductive device in the reply filed on 9/19/2005 is acknowledged. The traversal is on the ground(s) that the claims are not patentably distinct. This is not found persuasive because Poleshuk clearly discloses a generic proximity sensor 20 on a holster that senses the presence or absence of a fuel nozzle. If there is no patentable distinction between the species, then the Poleshuk reference will anticipate all of the devices. If Applicant maintains that there is no patentable distinction between the species, then a reference which show any one of the devices, such as an ultrasonic device, will reject all of the devices including the inductive, capacitive and photoelectric devices, even thought there are material structural differences between the devices. Or, with the Poleshuk reference, since Poleshuk discloses an inductive sensor 20, this inductive sensor will anticipate the ultrasonic and photoelectric devices even though an inductive device does not include any capacity to generate ultrasonic waves or a photoelectric signal. However, if Applicant desires to maintain that there is no patentable distinction, the restriction requirement will be withdrawn.

Page 2

The requirement is still deemed proper and is therefore made FINAL.

- 2. Claims 4-6 and 14-16 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 9/19/2005.
- 3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Application/Control Number: 10/804,140 Page 3

Art Unit: 3751

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

- 4. Claims 1-3, 7-13 and 17-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Poleshuk. Poleshuk discloses a fuel dispenser including a fueling hose 31, a fueling nozzle 81, a nozzle holster 51, a proximity sensor 20 that senses the presence or absence of the nozzle 81, a generic electrode as claimed and as are either of the coils used in the disclosed embodiments and an inductive device as is the pulse induction sensor the disclose of which begins on col. 5, line 50.
- 5. Claims 1, 2, 8-12, 17, 19 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Smith. Smith discloses a fuel dispenser including a fueling hose 23, a fueling nozzle 22, a nozzle holster 12, a proximity sensor 36 that senses the presence or absence of the nozzle 22 and a generic electrode as claimed 30, 34.
- 6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nanaji discloses another fuel dispenser with a proximity sensor in the holster.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to J. Casimer Jacyna whose telephone number is 571-272-4889. The examiner can normally be reached on Wed. thru Fri. 9AM-7PM, Mon. 7AM-1PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Justine Yu can be reached on 703-272-4835. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
